

GHANSHYAM KUMAR SINGH

Associate Product Manager | Consumer Growth, Monetization & 0→1 | AI Products

Gurugram, India • +91 8804041515 • ghanshyamrock05@gmail.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Associate Product Manager with **4+ years of end-to-end product lifecycle ownership** across consumer platforms serving **50M+ users / 3L+ DAU**, 0→1 platforms, growth, monetization, and AI products. Grew daily revenue **167% (₹3L → ₹8L/day)** over two quarters, improved **D7 retention from 12% to 25%**, and built a **0→1 customer analytics platform** replacing \$50K+/year third-party tools. Core expertise in growth & monetization strategy, product discovery, experimentation, product analytics, and cross-functional pod leadership. Currently building GenAI voice and conversational AI products from 0→1.

CORE PRODUCT EXPERTISE

- **Product Strategy & Discovery:** Product Vision, Product Discovery, Roadmapping, PRDs, Prioritization (RICE), Go-to-Market, Product Lifecycle Management, OKRs & KPI Frameworks.
- **Growth & Monetization:** Experimentation, A/B Testing, Funnel & Cohort Analysis, Retention & LTV Optimization, Conversion, ARPU, Pricing, Dynamic Monetization, Loyalty.
- **Product Analytics:** SQL, Product Analytics, Behavioral Segmentation, Lifecycle Analytics, Experiment Analysis, CleverTap (Certified).
- **AI Product:** GenAI Product Design, Conversational AI, Voice AI, Prompt Design, AI Evaluation & Quality Metrics, LLM Guardrails & Continuous Optimization.
- **Technical:** APIs, SDKs (Android/iOS/Web), Data Pipelines, AI-Assisted Prototyping (Cursor, Antigravity, Claude Code), Firebase, System Architecture Specs.

WORK EXPERIENCE

AIVO Technologies Pvt. Ltd. | [Associate Product Manager](#)

May 2026 – Present | Gurugram, India

(GenAI Product Studio building conversational AI and customer analytics tools)

MYSMARTASSISTANT — GENAI VOICE & PRODUCTIVITY PLATFORM (B2C & B2B)

- **Product Discovery & 0→1 Launch:** Conducted user research across 200+ target users, identified that small businesses lacked affordable 24/7 response tools; defined product vision, authored PRDs, and managed the full product lifecycle through go-to-market. Led a cross-functional pod of **8 (4 Engineering, 2 Design, 2 QA)**.
- **Strategic Prioritization:** Prioritized voice calling over chat after customer interviews revealed **3x higher willingness-to-pay** for voice automation; sequenced a 15+ feature backlog using RICE and shipped the MVP in **4 weeks**.
- **Monetization & Activation:** A/B tested tiered SaaS subscription plans and optimized onboarding funnels, achieving a **15% lift in Day-1 activation** and generating the product's first revenue within **3 weeks of launch**; deployed behavioral push notifications around peak user-activity windows and targeted WhatsApp campaigns to strengthen retention.
- **AI Product Quality & Evaluation:** Defined task-resolution KPIs including intent completion rate and CSAT; iterated on prompt design and conversational flows to achieve **92%+ task-resolution accuracy** across multilingual voice workflows. Implemented **hallucination-mitigation guardrails** and an automated exception-flagging pipeline to monitor call issues and continuously optimize prompt performance.

GROWTHTAP — CUSTOMER ANALYTICS & ENGAGEMENT PLATFORM (0→1)

- **Business Case & Platform Vision:** Identified that third-party analytics platforms including CleverTap and MoEngage cost \$50K+/year and lacked customization; built the business case, secured founder buy-in, and owned the full product lifecycle from vision to production.
- **Product Roadmap & Delivery:** Defined requirements for behavioral analytics including funnels, cohorts, and segmentation, omnichannel engagement across push, in-app, and webhooks, and cross-platform SDKs for Android, iOS, and Web, reducing client SDK integration time by **60%**.

LAVOLA.AI — AI COMPANION & REAL-TIME VOICE PLATFORM (0→1)

- **0→1 Product Lifecycle & Launch:** Defined product vision, roadmap, PRDs, and MVP scope for an AI companion platform with real-time voice calling and multi-persona dialogues; led an engineering pod from ideation to launch and built the marketing web platform using AI-assisted development (Cursor, Antigravity).

Witzeal Technologies Pvt. Ltd.

May 2021 – May 2026 | Gurugram, India

[Career Progression: Product Intern → Associate Product Manager](#)

(Parent company of BigCash [India, Brazil, Canada] & Big Sports | 50M+ users | 3L+ DAU)

REVENUE GROWTH & MONETIZATION:

- **Grew daily revenue 167% in two quarters** (₹3L → ₹8L/day) for Rocket Skill Game, serving **30K–40K DAU**, by conducting competitor pricing research and running 10+ structured A/B tests across entry fees, prize structures, and user segmentation to identify and prioritize high-impact economy changes.
- **Drove 10% WoW GMV growth** and **12% purchase-conversion uplift** across tier-2/3 user cohorts through A/B experiments on contest entry points, payout ratios, and promotional offer timing, improving user LTV.
- **Reduced bonus expenditure by 20%** while maintaining retention by analyzing incentive ROI across user segments and optimizing bonus structures, directly improving unit economics.
- **Scaled VIP active users from 45K to 65K (+44%)** in one quarter and increased **VIP ARPU from ₹8K to ₹14K (+75%)** by restructuring loyalty into a 3-tier progression (₹5K, ₹50K, ₹100K bets) with in-game status badges, 10X streak rewards, and 60% milestone nudges.

RETENTION & ENGAGEMENT:

- **Improved D7 retention from 12% to 25%** and **D7 active retention from 22% to 48%** by identifying onboarding friction through user behavior analysis and shipping targeted engagement mechanics including streaks, rewards, and events.
- **Increased games-per-user by 20%** and **average transaction value by 20%** through gamification and targeted engagement interventions that lifted DAU-to-paying-user conversion.
- **Preserved seasonal revenue run-rate** by launching real-time promotional events synchronized with IPL cricket matches to counter historical activity drop-offs.
- **Led a 10-day product pivot** following a regulatory market shift, coordinating Product, Engineering, Marketing, and Legal to redesign monetization and launch on the App Store and Google Play within the deadline.

PRODUCT-LED CRM & AI AUTOMATION:

- **Phase 1 — Built CRM from scratch (TAT 3–4 days → 1–2 hours):** Diagnosed 3–4 day resolution TAT and 2/5 CSAT as major contributors to customer dissatisfaction and churn; structured the support vertical from scratch — defined OKRs, designed ticketing dashboards, authored SOPs, hired and led a **10+ member team**, and established bi-weekly user-feedback loops into the product backlog, reducing standard TAT to **1–2 hours** and complex escalations to **<12 hours**.
- **Phase 2 — Shipped Agent Helper AI:** Identified that FRT and CSAT remained low because agents lacked training and real-time context; defined requirements for an AI assistant that auto-populated user context including account state and transaction history and suggested response templates — improved **CSAT from 2/5 to 4.2/5** and reduced **FRT to under 2 minutes**.
- **Phase 3 — Deployed AI Chatbot:** Analyzed ticket logs to identify high-frequency routine query categories such as game-loss inquiries and simple status checks; defined conversational flows for an autonomous AI chatbot that **deflected 40–50% of routine ticket volume**, allowing human agents to focus on complex escalations.

ANALYTICS & LIFECYCLE PLATFORM:

- **Owned customer analytics and omnichannel lifecycle engagement for 50M+ users**, executing automated CleverTap campaigns across push, in-app, WhatsApp, SMS, and email; designed A/B tests on messaging triggers that reactivated **22% of dormant users** within 30-day windows, reducing churn and improving LTV.
- **Redesigned KYC verification platform (12–24 hours → under 1 minute):** Replaced single-vendor OCR with government PAN+DOB API checks and negotiated multi-vendor contracts (Authbridge, Cashfree) at **₹1/successful KYC vs. ₹4 (75% cost reduction)**; built automated failover achieving **98%+ uptime** and accelerated redemption-to-addcash cycles.
- **Built an Indian name-matching algorithm with 95% accuracy**, reducing manual-review volume from **1,000–1,500 to 30–50 entries/day (~97% reduction)** and reducing name-matching TAT to **5–10 minutes**; optimized for Indian naming conventions where no commercial solution existed.
- **Delivered a compliance feature in 5 days** by aligning founders, Legal, and Finance under regulatory pressure to ship a retention-protecting product change.

PRODUCT INTERN (MAY 2021 – MAY 2022):

- Conducted **2,000+ user research interviews** across active and churned users; synthesized findings that shaped onboarding redesign and feature prioritization and contributed to subsequent D7 retention improvements. Earned a Pre-Placement Offer (PPO).

EDUCATION

PGDM – Information Technology

Xavier Institute of Social Service (XISS), Ranchi | 2020–2022

- Academic Silver Medalist (Rank 2) | **CGPA: 8.39 / 10**

B.Sc. Information Technology

St. Xavier's College, Ranchi | 2016–2020

- First Class Distinction | **66.28%**

CERTIFICATIONS & AWARDS

- **CleverTap Certified** — Behavioral Analytics, Audience Segmentation, Lifecycle Journeys.
- **Power Award (2x) & Pinnacle Award (3x)** — High-impact product delivery and cross-functional execution at Witzeal.
